

TOTALLY RELIABLE ALUMINIUM ROLLER DOORS

Robinson Roller Shutters

34mm and 57mm Aluminium Shutters

Specified by leading transport manufacturers worldwide, these aluminium shutters are famed for their 100% reliability, strength and durability.

Structurflex is the exclusive New Zealand agent for Robinson, a UK brand that has more than 50 years experience in producing high quality shutters for the most demanding journeys.

ROBINSON ROLLER SHUTTERS

The Robinson Roller Shutter is a lightweight aluminium door, ideal for a variety of applications from firefighting and home delivery vehicles to large rear doors on trucks. They seal effectively, are easy to operate and resilient to damage, even years down the road. The alloy slats come in two sizes – 57mm or the 34mm, which has a tighter roll for smaller compartments.

Exceptionally easy to operate, Robinson Roller Shutter Doors are manufactured by Structurflex to fit your truck exactly. Clever design has meant they can be fitted in minimum time, resulting in lower installation costs for you.

Key benefits of Robinson Roller Doors

- Custom-made to fit your truck.
- Effectively seals against road dirt and water with top, bottom and side seals provided as standard.
- Easy to open and shut with a pre-tensioned, lubricated, efficient operator spring with simple adjustment.
- Robust and secure.
- High quality galvanised track provided as standard.
- Available in mill or powder coated white finish.
- Flat surface provides suitable background for graphics and branding.

57mm shutter:

- A lightweight option, ideal for standard applications.
- Custom built and fitted with an 'L' handle slam lock as standard.
- Cost effective and suitable for both rear and side door applications.

34mm shutter:

- A tighter roll for smaller compartments, ideal for side door applications.
- A heavy-duty slat with nylon seals at every joint for superior water and dirt protection.
- Choice of locks include the lift bar and 'L' handle slam lock options.
