

FIRST-AID IN SHELTERED WATERS

Harbour Boom

Designed for rapid deployment in sheltered waters, the Structurflex Harbour Boom is strong, lightweight and easy to handle. It's ideal as a first response solution for harbours, small lakes and calm-water rivers.

Also known as Fence Boom, its compact dimensions and minimum volume allow for ease of storage and simplicity of deployment from either aluminium racks or reels. This makes it the ideal solution to be permanently stored at critical spill areas such as marinas or on water refuelling stations.

HARBOUR BOOM

Applications

Inner harbours, marinas, small lakes and calm rivers.

Specifications

MODEL	HB500	HB750
Freeboard (mm)	165	250
Draft (mm)	335	500
Overall height (mm)	500	750
Weight (kg/m)	2	3
Section lengths (m)	Both models available in 10, 15, 20, 25 or 30 metre lengths.	

Key Benefits:

- Ready to use – no inflation required
- Simple deployment from aluminium racks or reels
- Durable construction with HF-welded seams
- Tool-free connectors

Materials

Fabric	PVC coated polyester 690 g/m ²
Floatation	Closed cell polyethene
Ballast	8mm galvanised chain
Colour	Red
Handles	Every 2 metres
Connectors	Marine grade aluminium with 6mm toggle pins

Optional Equipment

Ground sheet/carry bag, aluminium dispenser rack, repair kit, towing bridle, anchor bridle.
