

# STRUCTURFLEX PROMOTIONAL CANOPIES FOR BRANDING WITH REAL IMPACT

## **Structurflex canopies, outstanding in their field**

Structurflex canopies make sure you stand head and shoulders above the crowd. On the sports field, exhibition or field days, entice customers with your own Structurflex canopy promoting your brand or image while providing an excellent hospitality area or covered trade display.

## Make sure you stand head and shoulders above the crowd

### Image Projection

A high profile canopy sets your image above the rest. Structurflex canopies stand head and shoulders above regular marquees, projecting your innovative image, unique logo and identity to the public.

### Fabric

All Structurflex canopies are made from acrylic-coated, polyester reinforced P.V.C. fire-retardant fabric specially treated to prevent moisture wicking.

### Tensioning System

The all-welded fabrication, anodised aluminium poles, passivated pegs, polyester guy web and double purchase tensioning system ensure high quality and long life.

### Portability

The 8m x 6m canopy complete with pegs, poles, walls and carry bags is easily transported in the average size hatchback.

### Simple Erection

The Structurflex canopy is lighter to erect than a conventional tent structure. With fewer poles and a simple effective tensioning system the easy to follow layout plan makes for speedy erection. An 8m x 6m canopy can be erected by two people in 15 minutes.

### Easy to Clean

The acrylic lacquered P.V.C. surface can be readily cleaned with mild detergent or 'Fleetwash' vinyl cleaner.

## Specifications

Structurflex canopies are available in three standard sizes 12x9m, 8x6m and 5.5x4m. Canopies are supplied with Ridge Poles, Edge Poles, Pegs, Carry Bags and erection instructions. Walls are supplied in sections and a full set requires 8 walls per canopy.
